

LOHAS
COAT 

Instruction manual

Thank you for choosing a agney* product.
Please read this manual before using this product.

LOHAS COAT

LOHAS COAT is a coating technology developed in-house that suppresses e-coli and staphylococcus aureus thanks to a synergistic effect of the paint that contains natural green tea ingredients and phytoncide already a component of the bamboo itself. All agney* tableware utilizes this new LOHAS COAT technology, allowing us to manufacture safer and more reliable natural dishware.

* This coating is not guaranteed to control all bacteria or have permanent benefits.

A six-layer coating that penetrates into the material prevents discoloration and staining by foods. You can use this product every day with peace of mind.

Care after use

This product can be washed using residential dishwashers.

* Limited to use at a warm water temperature setting not higher than 70°C.

* Dishwasher detergents containing bleaching or abrasive agents cannot be used.

- After using this product, use either a residential dishwasher or a soft sponge with a neutral detergent for tableware to wash it carefully with water.
- After washing the product, carefully rinse off the detergent, wipe it dry with a soft cloth, and then store it away from direct sunlight.

- * This product was individually handmade from natural materials. Please be aware that there may be differences in hue, shade, and shape depending on the product.
- * We can not assume the responsibility for problems or damages resulting from failure to observe instructions given in this instruction manual.
- * Please understand in advance that this service may altered without prior notice or suspended or terminated after a set notification period.
